

## Inpro Team visiting Belgium

The transnational meeting took place in Antwerp on 20-21 of April 2023. The steering group members came together at the meeting location in the city of Antwerp. It was hybrid so other members could join online. The modern world taught us how to work online, and time to time a live meeting is good for the collaboration. Thoughts were exchanged and ideas for the future were created.

We took a bird view to see the links between the work packages. The collaboration that took place in exchanging materials, tools and knowledge between partners was interesting to discover. The bigger picture includes the INPRO Competency Framework (INPRO CF), the WHO International Classification of Functioning (ICF), the international learning interventions and the interprofessional student-run

learning ward. Content has been developed over the last two year and during the meeting we reflected on our work with “the four-eye-principle”. The conclusions varied between ‘lesson learned’ and ideas changing for the future. The findings will be clarified and included in our materials so others can learn from them. We still learn from, with and about each other by giving constructive feedback.

Working together interprofessional and international with a clear scope of the two-day meeting on the quality of the process and the outcomes.

The website is in progress to be ready to place all deliverables and materials to get started yourself. The program of the end-seminar (30/11/2023-1/12/2023 @ Hanzehogeschool Groningen and Revalidatie Friesland) with key speakers and workshops will soon be announced on our social channels. INPRO team members will participate at different congresses to share content of INPRO and to inspire you.

## Conclusion

The main themes of the productive two-day meeting with the whole INPRO Steering Group in Antwerp about the past and the future could be summed up in in one sentence:

***‘Coming together is a beginning; keeping together is progress; working together is success.’***

**Edward Everett Hale**
