

ALIGNING INTERPROFESSIONAL EDUCATION AND COLLABORATION IN PRACTICE

using promising regional experiences for international exchange

TRAINING FOR ALL THE DISCIPLINES TO EXPLAIN HOW ICF IS INTEGRATED IN OUR EPD

Rehabilitation Centre Revalidatie Friesland

The Electronic Patient Device (EPD) has much more potential than the various professional groups at Revalidatie Friesland (RF) knew. To create a common understanding and increase the use of ICF in EPD, a training module was created in RF's online learning environment for use by different professions. It included material and a video in Dutch on the possibilities of EPD suitable for professionals working in a multidisciplinary environment. An English translation of the text illustrates the contents.

The description of the development of this material is in the report "ICF-based Tools and Practices to promote the use of the ICF (appendix 13) on the INPRO website: <https://www.inproproject.eu/icf-based-tools-practices/>

Module translated in English.

ICF

Welcome to the ICF training. Great that you are going to take this training. Have fun learning!

Contents:

The ICF training consists of an e-learning and a test.

Appendices and manuals have been added as background information.

Follow the e-learning and learn everything about ICF. Completing the e-learning takes approximately 1 hour of your time. You can then test your appropriate knowledge by taking the ICF test. The results of your test will be used in INPRO research.

You can follow the full training during working hours.

Have fun learning!
